

5-Track - *Backatcha, Pod People!*

(Independently released CD-R, Progressive)

This band is part of a tiny yet slowly evolving and growing genre of music...that might best be described as minimalistic spontaneity.

This 13 track album contains tracks that many would say sound like the beginning demos for other songs. There is no attempt to create a wall of sound...or to come up with something catchy...or to create something sellable. This is a totally artistic creation in which the artist is having fun experimenting in the medium. Some of this reminds us of some of the more experimental/crazy underground cassette artists from the late 1980s (*think Michael J. Bowman perhaps...?*). Intriguing cuts include "Saturation," "Floating Around," "13 Sheep," and "Hang Loud."
